About Me

- Detail-oriented QA analyst with 2.5 years of hands-on experience testing unreleased PC games at G.Round.
- Proven track record analyzing and documenting reproducible defects; collaborated directly with dev teams to ensure timely resolution.
- Skilled in crafting concise bug reports, annotated logs and screen captures, and UX/UI teardown reports that accelerated fix cycles.
- E-Sports competitive experience at the international level, with analytical expertise in complex game systems, skill-based mechanics, and player behavior patterns; adaptable across diverse genres and platforms.

Education

- **BSc Computer Engineering** — University of Minho, *Final Stage*
- **Image Editing** — IEFP, Vila Nova de Gaia (200h, 2023)
- **Unity 3D — Introduction & 3D Modeling** — IEFP, Vila Nova de Gaia (50h, 2022)

Professional Experience

Reviewer – G.Round

Jan 2022–Present

- Stress-tested various of unreleased PC builds via G.Round; executed black-box, smoke & regression suites, flagged critical bugs pre-release.
- Promoted to invite-only Supporter tier after two playtests (top 5% of 500 testers); unlocked paid AA/AAA sessions.
- Delivered reproducible bug logs, annotated screen captures, and concise UX/UI reports that accelerated dev fix cycles.
- Reviewed gameplay builds from a player perspective; flagged edge cases, progression blockers, and design flaws overlooked by automated testing.

Operator – Continente

Oct 2023–Oct 2024

Logistics Assistant – Katoen Natie, Belgium

Summer 2019

Personal Projects

VoidScape

Ongoing

Developed in Unity using C#.

First-person roguelike prototype featuring procedurally generated dungeons, a complex weapon crafting system, and over 50 gameplay-modifying mechanics.

Conclusus

October 2022

Developed in Unity using C#.

Based on the HeavyLight template, this project has 30 levels (instead of 20) and more than four unique mechanics. It was completed in less time, maintaining quality.

HeavyLight

August 2022 - September 2022

Developed in Unity using C#.

Small 2D platformer and puzzle game, developed for WebGL. This project was created with the intention of being reusable in future short-term projects.

Technical Skills

- **Programming Languages & development:** C++, C#, Java, Python, JavaScript, Haskell, HTML, JSON, CSS, React
- **Game Engines:** Unity, UE5
- **Databases:** SQL, MySQL
- **Development Tools:** Visual Studio, Git, GitHub, GIMP
- **3D Modeling:** 3Ds Max
- **Collaboration Tools:** FoundryVTT, DokuWiki
- **System Administration:** Experience with Linux servers
